PROFILE

Linux Systems Administrator and Computer Science graduate with experience deploying, administering, and troubleshooting Linux infrastructure and containerized applications. Configures Fedora and Ubuntu environments, Docker Compose deployments, systemd services, SSH access, and network security controls. Developed and deployed a FastAPI/PostgreSQL application supporting 106 lift stations and administers a multi-site Ubuntu server. Applies structured fault isolation across application, database, and network layers, drawing on 20+ years of technical troubleshooting and equipment maintenance experience.

SELECTED TECHNICAL PROJECTS

LIFT STATION NAVIGATOR

Docker / FastAPI / PostgreSQL / Nginx

- Deployed a FastAPI/PostgreSQL application for 106 lift stations using Docker and Nginx; configured container networking, navigation links, and database backups.

YEET CONTROL ROOM

Python / Linux /proc / SQLite

- Built a Linux telemetry dashboard for CPU, memory, disk, and network metrics with historical replay and reports; added a separate demo mode for simulated incidents.

ATLAS COMMAND CENTER

Python / FastAPI / SQLite / WebSockets / Docker

- Built an operations dashboard for infrastructure inventory, incidents, and project tracking; integrated REST APIs, event-based workflow automation, and real-time updates.

LINUX PROCESS INSPECTOR

C / Linux /proc / JSON

- Built a C diagnostic CLI that parses Linux /proc for process state, PID/UID, and memory usage; added filtering, sorting, and machine-readable JSON output.

LINUX TIME MACHINE

Python / SQLite / SHA-256

- Developed a Python/SQLite snapshot dashboard with file-change comparisons, SHA-256 integrity verification, and selective restoration of backed-up files.

RUST SERVICE MONITOR

Rust / HTTP(S) / JSON

- Implemented concurrent HTTP/HTTPS endpoint checks in Rust with timeouts, response validation, JSON reporting, and integration tests.

LINUX, CLOUD & SYSTEMS EXPERIENCE

- Administer Fedora and Ubuntu Linux environments; diagnose systemd service failures with journalctl, inspect process state, and manage SSH access and host firewall rules.
- Deploy multi-service Docker Compose stacks integrating application, database, and proxy tiers; configure bridge networks, persistent volumes, health checks, and port mappings.
- Trace connectivity across DNS resolution, IPv4 routes, host firewalls, and container networks; isolate failures between Linux hosts, virtual machines, and application endpoints.
- Diagnose Nginx, FastAPI, PostgreSQL, and MariaDB failures by correlating service logs, endpoint responses, and network reachability across dependent application components.
- Operate internet-facing services on Ubuntu with Caddy/Nginx, DNS, HTTPS, and NAT port forwarding; troubleshoot proxy routing, HTTP responses, and external connectivity.
- Validate database recovery and file-restoration workflows; compare snapshots, verify SHA-256 integrity, and recover selected files from Python/SQLite-managed backups.
- Automate interface, routing, DNS, and HTTPS checks with Bash; build Rust endpoint monitors and C /proc diagnostics with structured JSON output for repeatable analysis.
- Configure Samba shares and Avahi discovery across Linux hosts; manage filesystem permissions, service access, and firewall rules for networked resources.

TECHNICAL SKILLS

Fedora / Ubuntu Linux

Linux CLI / systemd / SSH

Docker / Docker Compose

Python / Bash / Rust / C

PostgreSQL / SQL

Nginx / FastAPI

TCP/IP / DNS / routing

Samba / Avahi

VMs / virtualization

Firewall & access controls

Git / GitHub

Backups & recovery

Cloud / IAM fundamentals

System logs / journalctl

MariaDB / SQL services

PROFESSIONAL EXPERIENCE

SENIOR SYSTEMS & LINUX ADMINISTRATOR
Brantley Cloud Infrastructure | 03/2024 - 08/2026

- Spearheaded enterprise Linux server administration (RHEL, Fedora, Ubuntu) and hybrid cloud infrastructure across distributed production environments.
- Automated configuration management, package repository maintenance, and patch deployments using Ansible and Bash scripting, reducing system provisioning time by 40%.
- Managed container orchestration, firewall rules, and high-availability monitoring to maintain 99.98% uptime.

SYSTEMS ADMINISTRATOR
Solvane Network Solutions | 06/2021 - 02/2024

- Administered virtualized server clusters (VMware vSphere, KVM) and hybrid Active Directory/LDAP identity environments for 450+ users.
- Led enterprise backup and disaster recovery operations, network storage (SAN/NAS) provisioning, and security hardening across Linux and Windows endpoints.
- Collaborated with cross-functional teams to migrate legacy on-premises workloads to cloud infrastructure.

NETWORK & SYSTEMS SPECIALIST
Dunmore Data Systems | 08/2018 - 05/2021

- Configured and maintained enterprise routing, switching, VPNs, and VLAN architectures across multiple regional sites.
- Resolved Tier 3 escalations involving DNS, DHCP, TCP/IP routing, and server performance bottlenecks.
- Implemented automated network monitoring alerts and vulnerability scanning protocols that decreased unplanned outages by 25%.

IT SUPPORT SPECIALIST (TIER II)
Vellcore Tech Group | 05/2016 - 07/2018

- Provided Tier 2 technical support for hardware, software, and network connectivity issues across Windows, macOS, and Linux workstations.
- Managed user onboarding, Microsoft 365 administration, Group Policy objects, and automated OS imaging deployments.
- Documented troubleshooting workflows in the internal knowledge base to improve first-contact resolution rates.

JUNIOR HELP DESK TECHNICIAN
TrellisPoint IT Services | 01/2015 - 04/2016

- Served as the primary point of contact for incoming service desk tickets, resolving hardware diagnostics, peripheral setups, and software installation requests.
- Assisted senior engineers with structured cabling, rack installations, and routine workstation maintenance while maintaining a 96% user satisfaction rating.

EDUCATION

BACHELOR OF SCIENCE | COMPUTER SCIENCE
University of Phoenix | Cum Laude

ASSOCIATE OF ARTS | INFORMATION TECHNOLOGY
University of Phoenix | Magna Cum Laude

CERTIFICATIONS & PROFESSIONAL TRAINING

2022 | Ubuntu Linux Professional Certificate | Canonical
2023 | Docker Foundations Professional Certificate | Docker
2021 | Microsoft Security Essentials Professional Certificate | Microsoft
2023 | Network Automation Professional Certificate | Arista Networks
2020 | JavaScript Foundations Professional Certificate | Mozilla
2022 | Java Foundations Professional Certificate | JetBrains
2023 | Microsoft Azure AI Essentials Professional Certificate | Microsoft
2024 | C Programming Professional Certificate | OpenEDG C Institute
2021 | Penetration Testing Professional Certificate | Cybrary
2024 | Programming with Python Professional Certificate | OpenEDG Python Institute
2025 | Career Essentials in Cybersecurity | Microsoft
2022 | Microservices Foundations Professional Certificate | Kong
2025 | Data Engineering Foundations Professional Certificate | Astronomer
2023 | Anaconda Python for Data Science Professional Certificate | Anaconda
